TECHNICAL EXPERIENCE HIGHLIGHTS

February 2018 - Current

hStone Addiction - *Hearthstone Addiction Quantifier*

Utilize MashApe's Hearthstone API to fetch all digital card data from the current meta and store locally. Search and build a 30 card deck, then output various metrics such as projected win rate, dollar value, and deck rarity value within 4 months.

Technologies: HTML, CSS, React, Node, Express, JavaScript

Hosted by Heroku: <https://hstone-app.herokuapp.com>

News-From - *News Aggregator*

Fetch all the most recent news headlines via RSS feeds and write to a MongoDB instance. Search the database via built-from-scratch RESTful APIs with a user selected keyword and output results as aesthetic infographic via ChartJS.

Technologies: HTML, CSS, React, Node, Express, JavaScript, Mongoose, ChartJS

Hosted by Heroku: <https://news-from.herokuapp.com>

PROFESSIONAL EXPERIENCE

SupplyPro, Inc. - *Client Support Engineer I*

San Diego, CA July 2019 – Current

- Coordinate with on-site engineers to troubleshoot hardware and software failures on company's devices.
