Portfolio: <https://jdorfj.herokuapp.com>

CodePen: <https://codepen.io/juliusgdorfman>

PROFESSIONAL SUMMARY

Capable Web-Developer. High personal standards and eager to develop. Accustomed to developing from-scratch/modifying existing web content. Diligent, amiable, motivated. Experienced working collaboratively while maintaining personal responsibility.

TECHNICAL EXPERIENCE HIGHLIGHTS

February 2018 - Current

hStone Addiction - *Hearthstone Addiction Quantifier*

Utilize MashApe's Hearthstone API to fetch all digital card data from the current meta and store locally. Search and build a 30 card deck, then output various metrics such as projected win rate, dollar value, and deck rarity value within 4 months.

Technologies: HTML, CSS, React, Node, Express, JavaScript

Hosted by Heroku: <https://hstone-app.herokuapp.com>

News-From - *News Aggregator*

Fetch all the most recent news headlines via RSS feeds and write to a MongoDB instance. Search the database via built-from-scratch RESTful APIs with a user selected keyword and output results as aesthetic infographic via ChartJS.

Technologies: HTML, CSS, React, Node, Express, JavaScript, Mongoose, ChartJS

Hosted by Heroku: <https://news-from.herokuapp.com>

ImagEdits - *Web-Based Image Editors*

Upload a .jpg/.png and apply filters and adjust various qualities to save for use. Make use of HTML5 with the canvas tag to conditionally render client images.

Technologies: HTML, CSS Bootswatch, JavaScript, CamanJS(node package)

Hosted by GitHub Pages: <https://juliusdorfman.github.io/imagEdits>
